

INTRODUCTION OF PROPOSED NEW CHARTER

Christoph Bruch
Helmholtz Association

Session Title: Mixed licenses and access types in repository
based research outputs

Session Organizer: RDA/CODATA Interest Group on Legal
Interoperability of research data

Research Data Alliance Plenary
Aalto University, Helsinki, 22-25.10.2019

LEGAL INTEROPERABILITY OF RESEARCH DATA: PRINCIPLES AND IMPLEMENTATION GUIDELINES

RDA-CODATA Legal Interoperability Interest Group

September 8, 2016

- 
1. Facilitate the **lawful access** to and reuse of research data
 2. **Determine** the rights to and responsibilities for the data
 3. **Balance** the legal interests
 4. State the rights **transparently and clearly**
 5. Promote the **harmonization** of rights in research data
 6. Provide proper **attribution and credit** for research data
- 
- 
- 
- 
- 

Proposed Re-Charter, RDA-CODATA

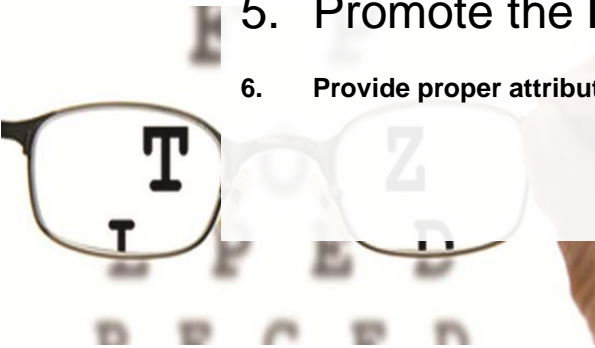

**The aim of the renewal is
to explore measures which can help
bridge the gap between the ‘open by default’ premise
reflected in the *Principles and Guidelines* and
the real-world needs of many researchers / research institutions
for a more balanced approach to data access and reuse.**

Proposed Re-Charter, RDA-CODATA

The proposed objectives of a renewed Interest Group are to:

1. To document use cases where communities of practice report barriers to implementing the *Principles and Guidelines*
2. To explore possible solutions to accommodate stakeholders needs.
3. To identify opportunities to create future working groups that will address specific issues concerning legal interoperability, and assess community priorities as to the most important activity to pursue in 2020
4. To prepare a Case Statement in support of one or more Working Groups to address the barriers to implementation and their solutions

- 
1. Facilitate the lawful access to and reuse of research data
 2. Determine the rights to and responsibilities for the data
 3. Balance the legal interests
 4. State the rights **transparently and clearly**
 5. Promote the **harmonization** of rights in research data
 6. Provide proper attribution and credit for research data
