So we're off and running for the 3rd WG Workshop, now somewhat expanded but with the same basic aim of more detailed coordination among RDA Groups of all kinds. I will shortly begin trying to nail down the date for the next version at NIST, post P6.

My question is about budgets - at a P5 discussion Kathy said we had \$27K left from the \$30K participant support budget from year one of the NIST grant. Is that \$27K in expenses or does the RPI loading factor come into play? That is, if the first four support requests come in and they total (ballpark) \$7K, do we have \$20K left or something less than that? I will have to keep some sort of running account or be able to look at a running account kept somewhere at RPI - either is ok with me.

And how important is it to spend \$30K or so each year, as opposed to 20 this year and 40 next, etc? I have the proposal that Mark and I wrote, but I don't think I have the award document. I assume I will have to send in an annual report to NIST after the Karlsruhe meeting and probably talk about money.

Thanks,

Larry

Invitation:
RDA Working Group Collaboration Meeting Karlsruhe
June 11 – 12, 2015

Dear RDA Group Chairs,

We would like to invite you to the 3rd Working Group Collaboration Meeting. This is a continuation of a working meeting series that was started in Garching in February 2014 and in Gaithersburg in November 2014.

The objective is to have focused discussion among participants: something which has proved elusive at the packed RDA Plenary meetings, and to generate discussion on how coordination amongst WGs can achieve more coherence and can improve overall RDA outputs.

The foci of the June meeting will be on

- interaction between the Data Fabric and Data Publishing coordination groups and their related WGs and IGs
- facilitate adoption questions from amongst IG attendees
- build connections between the technically oriented data provisioning and data consumer groups, and social/policy oriented data provisioning and data consumer groups

This format will allow for a detailed update from the next wave of working group outputs: those of RDA/WDS Data Publishing coordination group. Additionally, each participant will be invited to update on the current status of the represented group(s) in relation to the above topics.

Please notify the local organizers (danah.tonne@kit.edu, rainer.stotzka@kit.edu, saskia.baier@kit.edu, rainer.stotzka@kit.edu) before May 1:

- a) if you plan to attend
- b) the RDA group(s) you will represent

We will update the agenda at <https://www.rd-alliance.org/groups/3rd-working-group-collaboration-meeti...> accordingly and will add a list of participants.

Please find additional information below.

We are looking forward to meeting you in Karlsruhe
Rainer, Larry & Peter

Note that RDA/US has limited funding to support U.S. participant travel to these meetings. Contact Larry Lannom (llannom@cnri.reston.va.us) to request support.

Meeting location:

Karlsruhe Institute of Technology
Kaiserstraße 12
76131 Karlsruhe, Germany
Campus Süd,
Präsidiumsgebäude 11.30

A block of **guest rooms** are available at a rate of ~70 EUR until May 15, code: "KIT".

Hotel Eden
Bahnhofstraße 15,
76137 Karlsruhe
