

# The International Data Community contributing to the European Open Science Cloud

Lean / Find out how the Research Data Alliance and RDA Europe 4.0 impact the EOSC implementation and advance research data sharing in Europe

With over 8900 members (50% from Europe) and 87 working & interest groups (of which 25+ domain specific), RDA is the strategic partner to represent the research data community for EOSC and to achieve progress in thematic areas that need a global approach in a common framework.

RDA impact on the EOSC Implementation Roadmap Examples of relevant RDA working & What RDA is bringing to EOSC **EOSC Action line** Interest groups » Brokering Framework WG » National Data Services IG A number of working groups relevant to barrier » Provenance Patterns WG removal and data sharing » RDA/CODATA Legal Interoperability IG Architecture » Storage Service Definitions WG » Data Versioning WG » DMP Common Standards WG » Exposing Data Management Plans WG RDA fosters the development of professional practices » FAIR Data Maturity Model WG in research data management and stewardship on an » Repository Audit and Certification DSAinternational scale. WDS Partnership WG Data » WDS/RDA Assessment of Data Fitness for Use WG » A number of disciplinary groups RDA provides a forum for all 5 types of services for » Data Citation WG researchers defined in the EOSC roadmap. » Data Description Registry » Identification & authentication Interoperability WG » Work environment » Data Usage Metrics WG » Access to service information » Research Data Collections WG Services » Find, access, re-use and analyse research data » Research Data Repository generated by others Interoperability WG » Make data FAIR

Access & Interface

× × ×

Rules

RDA works on globalising metadata standards for including research data services in catalogues, both for universal entry point for all potential users and for community specific interfaces built on a common platform.

Leveraging the clear and transparent RDA process

Recommendations, three waves of outputs from the

RDA groups have been submitted to the European

for producing and endorsing its outputs as

be recognised as ICT technical specifications.

- » Data Type Registries WG
- » FAIRSharing Registry: connecting data policies, standards & databases WG
- » Metadata Standards Catalog WG
- » Persistent Identification of Instruments WG
- » PID Kernel Information WG
- » Software Source Code Identification WG
- » TS1 Data Foundation & Terminology Model
- » TS2 PID Information Types API-Persistent Identifier Type Registry
- » TS3 Data Type Registries Model » TS4 Practical Policies recommendations
- » TS5 Dynamic-data Citation Methodology
- multi-stakeholders' platform on ICT standardisation to » TS6 Data Description Registry Interoperability Model
  - » TS7 RDA/WDS Repository Audit and **Certification Catalogues**
  - » TS8 RDA/WDS Publishing Data Services

RDA is a bottom up organization, but equally an organization that funders and others trust to carry out its mission subject to its guiding principles.

- » Research Funders and Stakeholders on Open Research and Data Management Policies and Practices IG
- » Data for Development IG

RDA for you

Search your groups and outputs rd-alliance.org/rda-for-you

RDA is the context where existing and new EOSC initiatives can collaborate on best practises, guidelines and standards with international partners, and where EOSC approaches can be promoted globally.
