FDMentor

Strategy Development

What is the best way to approach research data management?

Who is involved and how to identify existing services?

We prepare guidelines for RDM „newcomers" within FDMentor.

Legal Issues

How to create a legal framework that promotes the publication of research data?

**We offer recommendations for handling legal issues at universities.**

Share Collaborate Integrate

Competence Enhancement

How to train existing personnel for research data management?

What skills are required?

We develop a train-the-trainer program and provide information and training material.
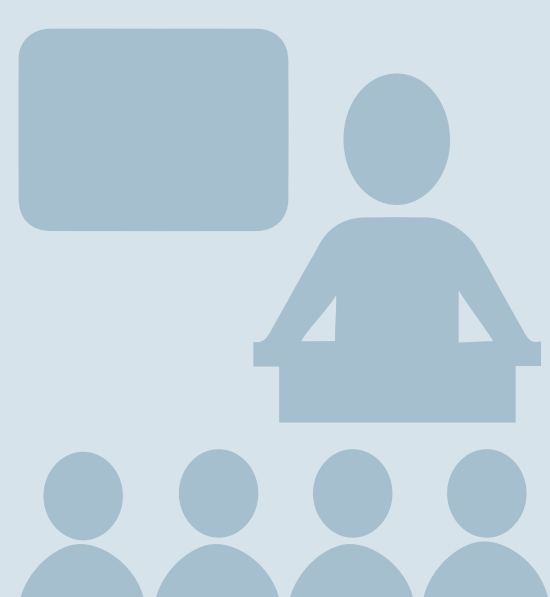

Research Data Policies

How to develop an institutional research data policy and which components are required?

Who has to be involved?

We document the insights by providing guidelines and a policy kit.
